Subject Index

References are to page numbers.
The suffix (L) = Letter to the Editor.
Alphabetization is letter-by-letter e.g.
T cells
T-cell vaccination

A
AChR *see* nicotinic acetylcholine receptor
Acute anterior uveitis
role of HLA-B27 5
Addison's disease
autoantigens in 233
Adhesion molecule *see also* integrin; lymphocyte migration
CD2, structure and function 177–187
chemokines and leukocyte recruitment 127–131
on T cells and mast cells 61–63
organ-specific migration of T cells and 280
PI 3-kinase in integrin-mediated adhesion 565–573
ADP ribosylation
bacterial toxins and T-cell membrane proteins 402–404
Affinity maturation
and Ig-gene rearrangement 92–96
Ageing *see* immunosenescence
AIDS *see also* HIV
chimpanzee model 149
effect of exercise on 253
noncytotoxic T-cell response and clinical course 220
oral administration of cytokines in 548
psoriasis and 45 (L)
protective immunity in 21–24
role of host immune response 120–126
role of ceramide 48 (L)
'tap' and 'drain' hypothesis 414
Allelic exclusion
of Ig-gene rearrangement 92–96
κ to λ ratio in immature B cells 200 (L)
Allergen
T-cell responses to 526–532
Allergy
Th1 and Th2 cells in 141, 530
Allorecognition
evolution of 589 (L)
AML1
role in lymphoid development 339
Anergy *see* tolerance
Ankylosing spondylitis
molecular mimicry in 66
role of HLA-B27 5
Antibody
diversity 395
human, expression in transgenic mice 391–397
neutralization of HIV 239–246
recombinant human 453–455
virus serotype evolution and 553–558
Antigen dissociation
from cell-surface antibodies 77–80
Antigen presentation
of exogenous antigen by MHC class I 131–137
HLA class I supermotifs 261–266
mucosal 56
role of proteasome 429–435
of self-peptide in RA 559–564
Antigen processing
of exogenous antigen by MHC class I 131–137
HLA class I supermotifs 261–266
mucosal 56
role of proteasome 429–435
Antigen recognition
autoreactivity and self-tolerance, a model 25–29
of virus structure 553–558
Antigen-presenting cell
B7-transfected keratinocytes 292 (L)
CD40–CD40 ligand interactions 410–414
tumor immunotherapy and 198 (L)
Antigenic variation
and antibody neutralization of HIV 243
APC *see* antigen-presenting cell
APO1 *see* Fas
Apoptosis *see also* Fas; Fas ligand
and cell cycle 345 (L)
in HIV 257
killing by macrophages 573–576
noncytotoxic T-cell response to HIV 221
in T cells, role of PTPs 385–390
of T cells in liver 522–524
Asthma *see* allergen; allergy
Astrocytes
and complement regulation 462–464
Autoantibody
penetration into living cells 163–164
Autoantigen
in endocrine autoimmune disease 232–238
in myasthenia gravis 307
Autoimmune disease *see also* autoimmunity; insulin-dependent diabetes mellitus; myasthenia gravis; reactive arthritis; rheumatoid arthritis
autoimmune thyroid diseases (AITDs) 235
dendritic cells in 560
endocrine, autoantigens in 232–238
IL-4–induced immune deviation 225–231
IL-12 in 215
oral administration of cytokines in 548
polyglandular syndrome, autoantigens in 235
psoriasis 45 (L)
Th1 and Th2 cells in 141
Autoimmunity
B cells in 207
immunological basis 300
modulation of T cells in 54
molecular mimicry in 64–70, 466–470
role of T-cell epitopes and MHC 80–85
T-cell epitopes in myasthenia gravis 307–311

B
B cell
in health and disease 206–208
B-cell activation
role of CD40–CD40 ligand interactions 410
B-cell antigen receptor *see also* antibody
autoreactivity and self-tolerance, a model 25–29
B-cell development
autoreactivity and self-tolerance, a model 25–29
a link between B1 cells and macrophages? 471–475
Peyer's patches in 30–39
B-cell epitope
autoreactivity and self-tolerance, a model 25–29
B-cell migration
tissue specificity, a role for Th1 and Th2 cells 421–424
B7
B7-transfected keratinocytes 292 (L)
Bacterial toxin
relationship to T-cell membrane protein 402
Bacteriophage P1
vector 393
BMI1
role in lymphoid development 339
Bone marrow transplant *see also* transplantation
microchimerism and graft survival 577–584, 584–587, 588 (L)
BSAP
role in lymphoid development 341
Bullous disease
immunology of 111

C
c-Myb
role in lymphoid development 339
CIITA
role in lymphoid development 341
Calpain
in rheumatoid arthritis 545–547
Calpastatin
in rheumatoid arthritis 545–547
Cancer *see also* tumor immunology
abnormal T-cell–ECM interaction 344 (L)
effect of exercise on 253

IL-12 in 216
melanoma 405–406
modulation of T cells in 54, 365–368
humoral response to p53 354–356
Carcinoembryonic antigen (CEA)
CD66 and CD2 179
CD antigens
swine leukocyte differentiation antigens 352–354
CD2
and PI 3-kinase in cell adhesion 567
Schiff-base formation and 439
structure and function of 177–187
CD4
ligand for IL-16 250, 477
signalling via PI 3-kinase 189
CD5
a link between B cells and macrophages? 471–475
CD11b
ligand for CD23 in inflammation 418
CD11c
ligand for CD23 in inflammation 418
CD14
and integrin-mediated signalling 211
and monocyte heterogeneity 424–428
CD16
and monocyte heterogeneity 424–428
CD23
and cell adhesion 198 (L)
a new role in inflammation 418
CD28
signalling via PI 3-kinase 189, 568
CD40
regulation of T-cell responses 410–414
role in cell-mediated inflammation 487–491
CD40 ligand
defects in X-linked immunodeficiency 511–516
regulation of T-cell responses 410–414
role in cell-mediated inflammation 487–491
CD45 *see also* protein tyrosine phosphatase
B220 isoform on T cells 522
CD48
as CD2 ligand 178
CD58
as CD2 ligand 178
CD59
and CD2 178
CD94
killer-cell inhibitory receptor 213
CD97
EGF-TM7 family 283
CDR *see* complementarity-determining region
Cell adhesion
CD23-mediated 198 (L)
Ceramide
role in HIV and AIDS 48 (L), 257
Chemokine
and cell migration 127–131
structure and function of IL-16 476–480
induction by herpesviruses 199 (L)
induction of T-cell–ECM interactions 18
Chemokine receptor
cofactor for HIV 299, 447
induction by herpesviruses 199 (L)
Chlamydia
HLA-B27 and disease 5
Chronic active hepatitis
autoantigens in 235
CLIP
mimicry in MAIDS 47 (L)
Collectins *see* mannose-binding lectin
Comparative immunology
and Ig-gene rearrangement 92–96
evolution of immune modulators 55–57
thymuses of ectothermic vertebrates 442 (L)
Complement
activation by mannose-binding lectin 535
in brain, role in health and disease 461–466
C4 hydrolyis 105
in xenograft rejection 373–378, 379–384
Complement receptor (CR)
on astrocytes 463
CR1, cleavage from cell surface 345 (L)
CR3 and integrin-mediated signalling 210
Complement regulatory proteins
in xenograft rejection 373–378, 379–384
Complementarity-determining region (CDR)
CDR-grafting, in transgenic mice 391–397
in TCR crystal structures 331, 332, 543
Corticosteroids
therapy in RA 10
Costimulation
CD40–CD40 ligand interactions 410–414
and T-cell signalling via PI 3-kinase 193
in RA 560
CTL *see* cytotoxic T lymphocyte
Cyclophilin
inhibition in HIV infection 259–260
Cyclosporin A (CsA)
in HIV infection 259–260
Cytokine
autocrine secretion of 303–304
induction of T-cell–ECM interactions 17
intracellular, measurement of 305–306
oral administration of 548–550
physiological concentration of 303–304
production by NK1.1 cells 73
Th1 and Th2 138–146
therapy in RA 10
Cytotoxic T lymphocyte (CTL)
coordinate regulation with NK cells 174–176
inhibitory MHC class I receptors 86–91, 450–453
in lung during HIV 359–364
D
Delayed xenograft rejection
definition 379–384
Dendritic cell
development and differentiation of 273–278
myeloid origin 273–275
self-peptide presentation in RA 559–564
Differential avidity
and low-affinity T-cell epitopes 80–85
DnaJ
molecular mimicry in RA 466–470
E
E2A
role in lymphoid development 340
EAE *see* experimental autoimmune encephalomyelitis
EBF
role in lymphoid development 341
ECM *see* extracellular matrix
EGF-TM7 *see* epidermal growth factor seven-transmembrane family
EMR1
EGF-TM7 family 283
Endothelial cell
role in xenograft rejection 373–378, 379–384
Eosinophilia
apoptosis or differentiation? 98 (L)
Epidermal growth factor seven-transmembrane (EGF-TM7) family
structure and function 283–287
Epithelial cell
Ets1
role in lymphoid development 340
Evolution
of allorecognition 589
of autoimmunity 302
and function of HLA-A2 165–170
of HLA class I supermotifs 261–266
of Ig-gene rearrangement 92–96
of immune modulators 55–57
of mannose-binding lectin alleles 535
molecular mimicry and database screening 357
of neuroendocrine–immune interactions 315
of 20S proteasome 431
thymuses of ectothermic vertebrates 442 (L)
of virus serotypes, role of antibody 553–558
Experimental autoimmune encephalomyelitis (EAE) *see also* multiple sclerosis
TCR usage in 152–159
Extracellular matrix (ECM)
abnormal T-cell interaction in cancer 344 (L)
calpains/calpastatin in RA 545–547
chemokines and cell migration 129
role in T-cell-mediated inflammation 17–20
Eye
immunology of 447–450
F
Fas
apoptosis and cell cycle 345 (L)

Fas ligand (FasL)
apoptosis and cell cycle 345 (L)
F4/80
EGF-TM7 family 283
FcεRI
and IgE immune complex dissociation 77–80
FcγRIIIB
and integrin-mediated signalling 210
FK506
and immunomodulation of RA 11
treatment of skin diseases 106–108
Follicle
in Peyer's patches 35
Forbidden clone
theory of autoimmunity 300

G
G protein
and PI 3-kinase in cell adhesion 569
GATA
role in lymphoid development 337
Gene rearangement
human Ig genes in transgenic mice 391–397
Ig genes, hypermutation and gene conversion 92–96
Gene therapy
cytokines in cancer 39–45
type I interferons and 370
in IDDM 8
Germinal centre
B-cell proliferation in 206
in Peyer's patches 35
Glial cells
complement biosynthesis 464
Glutamic acid decarboxylase (GAD)
in IDDM 232
Glycosaminoglycan
in T-cell–ECM interactions 17
gp120
neutralization epitopes on 241
Graft-versus-host disease (GVHD)
microchimerism and 577–584, 584–587, 588 (L)
Gram-negative bacteria
HLA-B27 and disease 5
Granulocyte–macrophage colony-stimulating factor (GM-CSF)
in HIV infection 257
Graves' disease
autoantigens in 235
Gut *see* mucosal immunology
GVHD *see* graft-versus-host disease

H
H gene
theory of autoimmunity 300
Hashimoto's thyroiditis
autoantigens in 235
Hemmorrhagic shock
oral administration of cytokines in 549
Heparanase
in T-cell–ECM interactions 18
Herpesvirus
chemokine and chemokine receptor induction by 199 (L)
HEV *see* high endothelial venule
High endothelial venule (HEV)
migration of memory T cells 281
History
discovery of the lymphocyte 288–291
HIV
antibody neutralization of 239–246
cellular metabolism and 256–258
ceramide and 48 (L), 257
effect of exercise on 253
mimicry of MHC 114–119
noncytotoxic CD8 T-cell response 217–224
protective immunity 21–24
psoriasis and 46 (L)
pulmonary responses 359–364
role of host immune response 120–126
superantigens and 121, 124
'tap' and 'drain' hypothesis 414
HLA
and response to HIV 120
evolution of allorecognition 589
evolutionary and functional significance of HLA-A2 165–170
HLA class I
HLA-B27, pathogenic role in arthropathy 5–7
HLA-B27 in reactive arthritis 160
HLA-G, molecular characterization 407–409
in serum, role in transplantation 99 (L)
supermotifs 261–266
HLA class II
HLA-DQ and HLA-DR in IDDM 323–329
molecular mimicry in RA 466–470
nomenclature 324
HMG box family
role in lymphoid development 340
Human immunodeficiency virus *see* HIV
Hyperacute xenograft rejection *see also* xenotransplantation
definition 373
Hypogonadism
autoantigens in 235

I
ICAM-1
chemokines and cell migration 127–131
ICAM-3
chemokines and cell migration 127–131
Id genes
role in lymphoid development 341
IDDM *see* insulin-dependent diabetes mellitus
IEL *see* intraepithelial lymphocyte
Ikaros
role in lymphoid development 340
IκB-α
role in lymphoid development 342
IL-2
autocrine secretion and physiological concentration 303–304
gene-targeted animals 484
gene therapy in cancer 39–45
new immunological functions 481–486
regulation 482
IL-2 receptor
IL-2Rγc defects in human X-SCID 507–511
gene-targeted animals 485
new immunological functions 481–486
regulation 482
IL-4
immune deviation in autoimmune disease 225–231
IL-4 receptor
shared elements with IL-13 receptor 108–110
IL-8
and FK506 106
IL-8 receptor
and FK506 106
IL-12
in autoimmune disease and cancer 215–216
sources 214
regulation of 215
IL-12 receptor
regulation of 215
IL-13 receptor
shared elements with IL-4 receptor 108–110
IL-16
structure and function 250, 476–481
Immune deviation
in eye and skin 448–450
IL-4-induced, in autoimmune disease 225–231
Immune surveillance
by NK1.1 cells 74
role of presentation of exogenous antigen by MHC class I 135
Immunodeficiency *see also* Wiskott–Aldrich syndrome; X-linked agammaglobulinemia; X-linked chronic granulomatous disease; X-linked hyper-IgM syndrome; X-linked severe combined immunodeficiency; X-linked thrombocytopenia
BTKbase 502–506
CD40Lbase 511–516
IL2RGbase 507–510
WASPbase 496–501
X-CGDbase 517–521
Immunoglobulin *see* antibody
Immunoglobulin genes
human, expression in transgenic mice 391–397
κ to λ ratio in immature B cells 200 (L)
rearrangement, hypermutation, gene conversion 92–96
recombinant human antibodies 453–455
Immunopathology
role of cyclophilin in HIV infection 259
noncytotoxic T-cell response to HIV 221
of parasite responses 551
pulmonary, during HIV 359–364
in RA 468
Schiff-base-forming drugs 440
viral, and lack of antibody 556
Immunopharmacology *see* neuroendocrine immunology
Immunosenescence
effect of exercise 252

significance of thymic involution 267–272, 442 (L), 492 (L), 493 (L)
Immunosuppression
signal transduction in cancer 39–45
Immunotherapy
of allergy 527
of autoimmunity 54, 228–229
of cancer 54
clinical use of type I interferons 369–372
cytokine genes and cancer 39–45
humoral response to p53 354–356
of melanoma 405–406
in myasthenia gravis 307–311
in rheumatic disease 9–12
Schiff-base-forming drugs 440
TNF-directed 255
Immunotoxicology
evolution of 55–57
Infectious disease
oral administration of cytokines in 548
role of $CD4^+$ T cells in leishmaniasis 13–16
Th1 and Th2 cells in 140
Inflammation *see also* autoimmune disease; immunopathology
a new role for CD23 418
role of CD40 487–491
role of IL-16 479
Innate immunity
effect of exercise 252–254
inhibitory MHC class I receptors 86–91
mannose-binding lectin 532–540
in parasite response 551
iNOS *see* nitric oxide
Insulin
as neuroendocrine self-antigen 314
Insulin-dependent diabetes mellitus (IDDM)
autoantigens in 232–234
immunotherapy 234
molecular mimicry in 67
role of HLA-DQ and HLA-DR 323–329
role of the islets of Langerhans 456–460
transplantation of pancreas and islets of Langerhans 7–9
Integrin *see also* adhesion molecule; ICAM-PI 3-kinase in cell adhesion 565–573
on T cells and mast cells 60–63
signal transduction by 209
Intercellular adhesion molecule *see* ICAM
Interferon (IFN-)
immunotherapy with TNF 255
regulation of 20S proteasome 431–433
oral administration of 548
type I, clinical use 369–372
Interleukin *see* IL-
Intraepithelial lymphocyte (IEL) *see also* mucosal immunology
and mast cells 60–63
Invariant chain *see also* MHC class II
and molecular mimicry 65
Islets of Langerhans
role in IDDM 456–460
transplantation of 7–9

J
Jenner, Edward
and the history of vaccination 203–204

K
κ to λ ratio
in immature B cells 200 (L)
Keratinocyte
as antigen-presenting cell 292 (L)
Killer-cell inhibitory receptor (KIR)
HLA-G in pregnancy 407–409
on NK cells and T cells 86–91, 212–214, 450–453
standard nomenclature 100 (L)
KIR *see* killer-cell inhibitory receptor
Köhler, Georges Jean Franz
obituary by C. Milstein 103
Kupffer cells
role in T-cell development 524

L
Leishmania
roles of $CD4^+$ T cells in 13–16
Langerhans cell
and dendritic cell ontogeny 273
LFA-3 *see* CD58
LMP2 *see* proteasome
LMP7 *see* proteasome
Long-term nonprogressors
in HIV disease 21–24, 48 (L)
'tap' and 'drain' hypothesis 416
Lung *see* pulmonary response
Lymphocyte migration
chemokines and cell polarization 127–131
discovery of 288
mucosal 58, 61
role of CD40 488
tissue specificity 421–424
Lymphocyte trafficking *see* lymphocyte migration

M
Macrophage
alveolar, during HIV 361
CD23 in inflammation 418
CD40-mediated activation 490
dendritic cell development and 273, 276
effect of exercise on 253
killing by apoptosis 573–576
link with development of B1 cells 471–475
presentation of exogenous antigen by MHC class I 131–137
role of P2Z purinoreceptor 292 (L), 293 (L)
Macrophage colony-stimulating factor (M-CSF)
in HIV infection 257
MAIDS
molecular mimicry in 47 (L)
Major histocompatibility complex (MHC) *see also* MHC class I; MHC class II
and molecular mimicry 64–70, 114–119, 466–470
immunodominance of low-affinity epitopes 80–85
Mannose-binding lectin (MBL)
clinical deficiency 536, 538
Ig-like functions 534
nomenclature 533
structure and function 532–540
Mast cell
and IgE immune-complex dissociation 77–80
and mucosal T cells, shared receptors 60–63
Maternal–fetal immunology
role of HLA-G 407–409
Th1 and Th2 cells in 141, 145
Mathematical model *see* quantitative model
Melanoma
progression 405
immunotherapy of 405–407
Memory T cell
migration of 278–282
Metalloproteinase
activity in RA 12
MHC *see also* major histocompatibility complex, HLA
MHC class I
evolution and function of HLA-A2 165–170
evolution of HLA class I supermotifs 261–266
killer-cell inhibitory receptors 86–91
mimicry in AIDS 115
presentation of exogenous antigen 131–137
role of 20S proteasome 429–435
serum HLA class I in transplantation 99 (L)
standard nomenclature for KIRs 100 (L)
MHC class II
HLA-DQ and HLA-DR in IDDM 323–329
mimicry in AIDS 115
mimicry in MAIDS 47 (L)
Microbial immunity
roles of $CD4^+$ T cells in 13–16
Microchimerism
and graft survival 577–584, 584–587, 588 (L)
Molecular mimicry
in autoimmunity 64–70
database screening for 357–358
in MAIDS 47 (L)
pathogenesis of RA 466–470
Monocyte
CD40-mediated activation 488
development and heterogeneity 424–428
MS *see* multiple sclerosis
Mucosal immunology *see also* pulmonary response
antigen processing 57
B- and T-cell migration 421–424
epithelial cells in 57
lymphocyte trafficking 58
Peyer's patches and B-cell development 30–39
T cells and mast cells 60–63
Mucosal infection
and inflammation 58
Mucosal vaccine 59
Multiple sclerosis
TCR usage in 152–159
Multivalent antigens
and cell-surface antibodies 77–80
Myasthenia gravis
T-cell populations in 307–311

N
Naive T cell
migration of 278–282
Natural killer cell
coordinate regulation with CTLs 174–176
effect of exercise on 252–254
inhibitory MHC class I receptors 86–91, 100 (L), 212–214
in leishmaniasis 14
Neonatal tolerance
and antigen dose 249
Neuroendocrine immunology
complement in brain 461–466
tolerance to neuroendocrine self-antigens 312–317
Neurohypophysial hormone
role in T-cell development 312, 313
Neutrophil
effect of exercise on 252–254
NF-κB
role in lymphoid development 341
Nicotinic acetylcholine receptor (AChR)
pathogenic epitopes in myasthenia gravis 307–311
Nitric oxide
and asthmatic inflammation 147 (L), 148 (L)
in parasite response 551
NK cell *see* natural killer cell
NK1.1
in liver 522
a new family of T cell 71–76
Nobel awards
in immunology 541
Nonprogressor *see* long-term nonprogressor

O
Oct2
role in lymphoid development 341
Oculo-mucocutaneous disorders *see also* eye; skin
immunology of 111
One-way paradigm
microchimerism and graft survival 577–584, 584–587, 588 (L)
Opsonization *see also* antibody; complement
by mannose-binding lectin 535
Oral tolerance *see* mucosal immunology
Organ transplant *see also* transplantation
microchimerism and graft survival 577–584, 584–587, 588 (L)
Oxytocin *see* neurohypophysial hormones

P
P2Z purinoceptor
role in immune system 292 (L), 293 (L)
p21^{ras}
and T-cell signalling via PI 3-kinase 192, 484
p53
and FK506 in skin disease 106
humoral response in cancer 354–356
p70^{S6K}
and T-cell signalling via PI 3-kinase 194
Pancreas *see also* insulin-dependent diabetes mellitus; islets of Langerhans
transplantation of 7–9
Parasite immunity
good versus bad responses 551–552
Parathyroidism
autoantigens in 235
Pemphigoid disorders 111–113
Peripheral tolerance
in autoimmunity 54
role of liver 522–424
Pernicious anemia
autoantigens in 235
Peyer's patches
role in B-cell development 30–39
Phage display
recombinant human antibodies 453–455
Phosphoinositide 3-kinase (PI 3-kinase)
role in IL-2 signalling 484
role in integrin-mediated adhesion 565–573
role in T-cell activation 187–197
Phylogeny *see also* comparative immunology; evolution
of immune modulators 55–57
PI 3-kinase *see* phosphoinositide 3-kinase
Pig *see* swine
Platelet-derived growth factor receptor (PDGF receptor)
and PI 3-kinase in cell adhesion 569
Positive selection
role of low-affinity T-cell epitopes 80–85
Pregnancy *see* maternal–fetal immunology
Programmed cell death *see* apoptosis
Proteasome
structure and function 429–435
Protein kinase C
and T-cell signalling via PI 3-kinase 193
Protein tyrosine phosphatase (PTP)
CD45 in T-cell signalling 385–391
Psoriasis
a T-cell-mediated disease? 46 (L)
PTP *see* protein tyrosine phosphatase
PU.1
role in lymphoid development 339
Pulmonary response
in HIV 359–364
Purinoceptor *see* P2Z purinoceptor

Q
Quantitative model
of B-cell autoreactivity and self-tolerance 25–29

R
Rbtn2
role in lymphoid development 339
RA *see* rheumatoid arthritis
ReA *see* reactive arthritis
Reactive arthritis (ReA)
cytokines in 162
HLA-B27 association 160
pathogenesis, role of bacteria 160
T cells in 162
Recombination
evolution of Ig-gene rearrangement 92–96
RFX5
role in lymphoid development 341
RGD sequence
and CD23-mediated cell adhesion 198
Rheumatoid arthritis (RA)
antigen-independent control of 170–173
calpains and calpastatin in 545–547
CD23 in inflammation 418
dendritic-cell-mediated presentation of self-peptide 559–564
immunotherapy of 9–12
molecular mimicry in 66, 466–470
Th1–Th2 balance in 171
RT6
molecular characterization 402
and autoimmunity 402

S
SAg *see* superantigen
Salmonella
HLA-B27 and disease 5
Sarcoidosis
immunology of 449
Schiff-base formation
definition 437
in T-cell activation 436–441
Shared epitope
molecular mimicry in RA 466–470
Signal transduction
abnormalities in cancer 39–45, 344 (L), 365–368
dimerized TCR model 332
gene therapy in cancer 39–45
PI 3-kinase in cell adhesion 569
PTPs in T-cell signalling 385–391
via IL-2 and IL-2 receptor 483
via IL-4 and IL-13 receptor 108–110
via IL-12 receptor 215
via integrins 209–212
Silicone
and inflammation? 147 (L)
Skin *see also* sarcoidosis; psoriasis
immunology of 448–450
Stress
exercise and the immune system 252–254
Superantigen (SAg)
and HIV 121, 124
Suppressor cells
soluble T-cell-derived proteins 318–322
Swine
leukocyte differentiation antigens 352–353

T
Tachykinin *see* neuroendocrine immunology
TAL1
role in lymphoid development 339
TAP transporter
interaction with 20S proteasome 430
Tc1 cell 143
Tc2 cell 143
T cell
mucosal, and mast cells 60–63
T helper cell *see* Th1 cell; Th2 cell
T-cell activation
abnormalities in cancer 54, 365–368
KIR-mediated inhibition 451
role of CD40 410–414, 490
role of covalent chemical events 436

T-cell antiviral factor (CAF) *see also* chemokine; chemokine receptor; noncytotoxic CD8$^+$ T-cell response to HIV 217–224, 297
T-cell development
CD4:CD8 ratio, genetic basis 414
in liver 522–525
and NK1.1 cells 71–76, 522
role of PTPs 385–391
role of thymic involution 267
T-cell differentiation
Th1 versus Th2 138
T-cell epitope
allergen specific 526–532
and molecular mimicry in autoimmunity 64–70
epitopes with low affinity for MHC 80–85
in myasthenia gravis 307–311
T-cell migration *see also* lymphocyte migration
conveyor belt model 97 (L), 247 (L)
and mucosal mast cells 60–63
organ specificity: 'naive' versus 'memory' 278–282
tissue specificity, a role for Th1 and Th2 cells 421–424
T-cell receptor (TCR)
crystal structure and function 330–336, 543
skewing in HIV 123
soluble 318–322
usage in allergy 526–532
usage in experimental demyelinating disease 152–159
T-cell repertoire
and CD2 185
and HIV 121
immunodominance of low-affinity epitopes 80–85
in NK1.1 cells 72
signalling via PI 3-kinase 189
T-cell selection
of NK1.1 cells 72
positive selection by thymocytes 344 (L)
role of low-affinity T-cell epitopes 81
T-cell tolerance *see* peripheral tolerance; tolerance
Tacrolimus *see* FK506
TCR *see* T-cell receptor
TCR repertoire *see* T-cell repertoire
Techniques
database screening for molecular mimicry 357–358
measurement of intracellular cytokines 305–307
recombinant human antibodies 453–455
Th0 cell 143
Th1 cell 139–146
allergen specific 530
differentiation 139
immune deviation of 225–227
in leishmaniasis 13–16
in parasite response 551
Th1-type cytokine 139–146
and HIV 257
in leishmaniasis 13–16
in parasite response 551
in RA 171–172
Th2 cell 139–146
allergen specific 530
differentiation 139
immune deviation of 225–227
in leishmaniasis 13–16
in parasite response 551
Th2-type cytokine 139–146
and HIV 257
in leishmaniasis 13–16
in parasite response 551
in RA 171–172
Thymic migration
medullary, conveyor belt model 97 (L), 247 (L)
Thymic epithelium
presentation of neurohypophysial hormones 313
Thymus
involution 267–272, 492 (L), 493 (L)
seasonal changes in 442 (L)
Thyroid peroxidase (TPO)
as autoantigen 235
Thyroid-stimulating hormone receptor (TSHR)
as autoantigen 235
TNF *see* tumor necrosis factor
Tolerance *see also* peripheral tolerance
induction in RA 10
and B-cell autoreactivity, a model 25–29
transplantation 577–584, 584–587, 588 (L)
Transcription
control of lymphoid development 336–343
Transmigration
chemokines and cell migration 127–131
Transplantation *see also* xenotransplantation
intrahepatic T cells 522–524
microchimerism in 577–584, 584–587, 588 (L)
one- versus two-way paradigm 577–584, 584–587, 588 (L)
pancreas and islets of Langerhans 7–9
Th1 and Th2 cells in 141
xenotransplantation 373–378, 379–384
Tucaresol *see* Schiff-base formation
Tumor antigen
low-affinity T-cell epitopes 84
melanoma-associated antigen 406
Tumor immunology
signal transduction in cancer 39–45, 344 (L), 365–368
humoral response to p53 354–356
Tumor immunotherapy *see also* tumor vaccine
antigen-presenting cells and 198 (L)
cytokine genes and 39–45
humoral response to p53 354–356
of melanoma 405–406
Tumor necrosis factor (TNF)
and HIV encephalitis 257
in RA 561
in T-cell–ECM interactions 18
regulation of 254–256
role in lung during HIV 359–364
Tumor necrosis factor receptor (TNFR)
regulation of 254–256
Tumor vaccine
and low-affinity T-cell epitopes 84
Tumour *see* tumor
Two-way paradigm
microchimerism and graft survival 577–584, 584–587, 588 (L)

V

Vaccine
HIV 23, 244
mucosal 59
strategy against parasites 551
Vasopressin *see* neurohypophysial hormone
Virus
epitopes, and HIV neutralization 240
evolution of structure and antibody response 553–558
serotype formation 553–558
Vitiligo
autoantigens in 235

W

Wiskott–Aldrich syndrome *see also* immunodeficiency
database of mutations 496–502
Wortmannin
inhibition of PI 3-kinase 188–191, 567

X

X-linked agammaglobulinemia (XLA)
database of mutations in 502–506
X-linked chronic granulomatous disease
database of mutations in 517–521
X-linked hyper-IgM syndrome
CD40–CD40 ligand defects in 410
database of mutations in 511–516
X-linked severe combined immunodeficiency (X-SCID)
database of mutations in 507–511
X-linked thrombocytopenia
database of mutations in 496–502
Xenoreactive antibodies
hyperacute rejection 373, 379
Xenotransplantation
advances in 373–378, 379–384
in IDDM 8

Y

Yeast artificial chromosome (YAC)
Ig-gene manipulation 392
